

TABLE OF CONTENTS

MATH MODELING. METHODS AND SYSTEMS OF INFORMATION PROTECTION, INFORMATION SECURITY

A. M. Gelfand Confidentiality, integrity, and availability threat model in message transmission	5
E. N. Drozdova, D. V. Sopov Developing a high quality animation algorithm with minimal render time	10
I. M. Egorov, E. N. Maksimov A variant of mathematical simulation of relaxation operational processes of medical textile elastomers	15
M. A. Egorova, S. V. Kiselev Development of methods for systematic and qualitative analysis of the operational processes of aramid textile materials	20
S. V. Kiselev Theoretical and experimental studies of operation processes of medical textile elastomers	25
N. S. Klimova Conducting a qualitative assessment of the performance properties of polymeric textile yarns	31
A. A. Kozlov Development of methods for investigation of deformation processes of medical textile elastomers.	35
A. V. Mayorov Architecture and software implementation of the spacecraft detection system in corporate and government information systems based on intellectual analysis methods	40
A. V. Maiorov, A. V. Krasov, I. A. Ushakov A model for representing big data about computer attacks in nosql format	47
A. G. Makarov, A. V. Demidov, N. V. Pereborova Solution of the problem of increasing the accuracy of mathematical modeling of the operational processes of polymeric textile materials	55
N. V. Pereborova Design of medical textile materials with recommendations based on the criteria for qualitative assessment of their performance properties	60
N. V. Pereborova, Ya. S. Tomashevich, A. A. Kolodin Development of methods for prediction of viscoelastic modes of operation of polymeric textile materials	66
E. N. Perevoznikov, E. V. Orlova Dynamics of financial processes of education «market bubbles» on the example of mathematical models	71
A. S. Shakhova, T. A. Kravec Modeling of the organization of the movement of buses along the route.	74
N. V. Pereborova, A. I. Eremin, K. Yu. Shilov, A. V. Kosenko, E. Yu. Kochkin, A. F. Grebnev Plastic deformation included in prediction of deformation processes of polymer materials	80
V. I. Vagner, V. D. Katushkin, E. O. Gretchenko, D. Avezov, A. V. Repsha, A. V. Parfenova Separation of the deformation of polymer materials into viscoelastic-plastic components	85
A. G. Makarov, V. V. Evdokimov, K. S. Churkin, F. S. Ryzhov, M. G. Dobryakova, V. S. Matveev Relaxation processes of polymer materials from the position of spectral theory	88

CHEMICAL SCIENCES

M. S. Zavadskaya, Yu. M. Kachina, S. M. Kosolapova, I. N. Pyagai
 Prospects for purification of alkaline mixtures of fatty acid esters by carbon dioxide 93

A. A. Kudinova, D. I. Gapaniuk, L. S. Rode, T. E. Litvinova, M. E. Poltoratskaya
 Influence of the porous structure of a carbon sorbent on the sorption of ethyl alcohol
 from an aqueous solution 99

Sh. D. Nabotov, I. N. Ganiev, A. G. Safarov, H. A. Asimov
 Anode behavior of aluminum alloy ALZr0.1% alloyed with lithium. 106

S. A. Yakimov, A. V. Koksharov, E. V. Belykh
 The effect of the cooking conditions on the resin content in hardwood sulfate pulp 112

AUTOMATION AND CONTROL OF TECHNOLOGICAL PROCESSES AND PRODUCTION

S. L. Gorobchenko, D. A. Kovalev
 Methodology for assessing the reliability of safety valves by the criterion of explosion resistance 115

V. S. Zurakhov, A. G. Makarov, K. N. Busygin
 Problem stages of data model design 124
