

TABLE OF CONTENTS

MATH MODELING. METHODS AND SYSTEMS OF INFORMATION PROTECTION, INFORMATION SECURITY

V. I. Wagner, I. M. Egorov, M. A. Egorova Conducting a system analysis of the viscoelasticity of polymer parachute straps	5
A. V. Demidov, A. G. Makarov Methodology of mathematical modeling of deformation processes of polymer textile materials	9
E. S. Chistyakova Mathematical modeling of elastic and restorative properties of polyester yarns	14
I. G. Drovnikova, A. D. Popov, A. D. Popova Vulnerability analysis of the linux operating system based on the standard CVSS	19
M. A. Egorova, I. M. Egorov Method for digital prediction of deformation processes of tissue for technical purpose	23
T. K. Zhukabayeva, V. A. Desnitsky, E. M. Mardenov Approach to simulation modeling of wireless sensor networks for attack detection	28
S. V. Kiselev Mathematical modeling of deformation processes of textile elastomers for implantology	34
N. V. Pereborova, A. G. Makarov Mathematical modeling of deformation processes of heat-resistant aramid materials	39
A. A. Kozlov System analysis of relaxation and creep of polyamide fabrics for parachute domes	44
A. V. Krasov, Alotum Yusef, I. A. Ushakov, V. V. Maximov, A. V. Arkhipov User authentication and identification using biometric keystroke dynamics based on “Manhattan and Euclidean distance”	49
A. V. Demidov, A. G. Makarov, N. V. Pereborova Mathematical modeling and numerical prediction of thermoviscoelastic processes of aramid textile materials	57
D. V. Kushnir, S. N. Shemyakin, A. V. Arkhipov, L. K. Sirotina Analysis of the indicator of resistance to linear cryptanalysis using the example of educational cryptographic transformation	62
A. G. Makarov, N. V. Pereborova Methods for computer prediction of viscoelasticity of aramid textile materials.	66
A. V. Meleshko Analysis of the possibility of applying the theory of preparation and decision making to ensure the security of wireless sensor networks.	71
E. V. Popova, A. D. Lihashva Content filtering algorithm in the web app for selection of wardrobe	79
I. V. Struchkov Detection of network traffic anomalies using an ensemble of classifiers	86
V. I. Wagner, N. V. Pereborova Mathematical modeling of operating processes of polymer parachute slangs	91
E. S. Chistyakova Methods mathematical modeling and numerical prediction of deformation processes of aramid materials	95

P. I. Sharikov, A. Yu. Tsvetkov, V. V. Sigacheva, L. K. Sirotina
 Investigation and algorithm for preventing exploitation of Log4j logging library vulnerabilities in Java application information systems 100

CHEMICAL SCIENCES

T. E. Litvinova, V. V. Vasiliev, N. V. Tuleshov
 Influence of impurities of various nature in aluminate solutions on the precipitation degree and particle size distribution of aluminum hydroxide obtained both by the bayer and sintering methods 107

Sh. D. Nabotov, I. N. Ganiev, A. G. Safarov, H. A. Asimov
 Anode behavior of the aluminum conductor alloy AlZr 0.1 doped with sodium in aqueous NaCl solution ... 116

AUTOMATION AND CONTROL OF TECHNOLOGICAL PROCESSES AND PRODUCTION

Ye. V. Yelaev
 The automated system for digital devise complex test check (CRIT) 122
