

TABLE OF CONTENTS

SYSTEM ANALYSIS, CONTROL AND INFORMATION PROCESSING

V. I. Wagner, N. V. Pereborova, Ya. S. Tomashevich Mathematical modeling and system analysis of the viscoelasticity of oriented polymeric textile materials	5
A. V. Demidov, A. G. Makarov Modeling and prediction of elastic, viscoelastic and plastic properties of synthetic threads	10
N. S. Klimova Mathematical modeling and system analysis of deformation properties of polymer files for parachute construction.	14
A. A. Kozlov, S. V. Kiselev System analysis of deformation properties of polymer sea ropes.	18
A. G. Makarov, A. V. Demidov Development of a methodology for qualitative assessment of deformational and operational properties of polymeric parachute lines	23

MACHINES, AGGREGATES AND TECHNOLOGICAL PROCESSES

A. A. Romanovich, V. P. Voronov, M. A. Romanovich, V. S. Prokopenko Unit for obtaining cubic-shaped stone from rocks with shale texture.	28
I. E. Menyailo Diagnostic parameters determination of the loom technical condition by the methods of fuzzy modeling.	33
N. R. Tourkina, A. A. Rak, D. A. Katsuba, G. O. Nagaev Analysis of the stress-deformed state of the die tooling when crimping ball plugs	37
A. K. Tsybikova, T. V. Ulzutueva The influence of technological processes of production on the operational properties of corrugated cardboard	42
A. A. G. Alshebly, N. V. Rokotov, N. N. Gulyaev, A. A. Ponomar Analysis of the effect of winding parameters on the reduction of the package length	45

PRODUCT QUALITY CONTROL. STANDARDIZATION. ORGANIZATION OF PRODUCTION

N. V. Pereborova Development of a methodology for qualitative assessment of performance properties of polymeric textile materials.	50
S. V. Kiselev, A. A. Kozlov Methods for investigation of deformation and relaxation properties of polymer sea ropes	54
M. B. Sukhanov, M. D. Dudnik Development of research on the application of machine learning in the textile industry.	59
D. A. Ermin, V. I. Pimenov, N. V. Pereborova Neuromarketing experiments data in textile industry products examination	64
R. A. Gorshkov, P. P. Rymkevich The use of solar energy for hot water supply in an industrial enterprise	69
A. Yu. Tumanov Functional quality management system of the production facility sustainability system.	73

A. Yu. Tumanov
 Scientific and methodological concept of quality management of systems
 for ensuring the stability of the functioning of instrument-making facilities in emergency conditions 78

D. A. Ermin
 Application of digital prediction of deformation processes of parachute lines
 for carrying out a qualitative assessment of their functionality 82

D. A. Ermin
 Qualitative assessment of performance properties of polymeric textile elastomers 87

TECHNOLOGY OF PRODUCTION OF TEXTILE AND LIGHT INDUSTRY PRODUCTS

I. M. Egorov, A. A. Kozlov
 Construction of mathematical models of deformation processes of textile medical elastomers 91

A. A. Kozlov, S. V. Kiselev
 Development of methods for prediction of processes of reverse relaxation of polymeric textile materials. 95

N. S. Klimova
 Mathematical modeling of deformation processes of polyester twisted yarns 99

A. G. Makarov
 Mathematical modeling and prediction of deformation and recovery processes of polymer filars 104
