

TABLE OF CONTENTS

SYSTEM ANALYSIS, CONTROL AND INFORMATION PROCESSING

N. V. Pereborova Methods of digital prediction of deformation and relaxation processes of polymer textile materials	5
V. I. Wagner, S. V. Kiselev, A. A. Kozlov, I. M. Egorov Methods of mathematical modeling of operational processes of polymer textile materials.	10
A. G. Makarov, A. V. Demidov Methods for digital prediction of elastic, viscoelastic and plastic deformation of polymer textile materials . . .	15

MACHINES, AGGREGATES AND TECHNOLOGICAL PROCESSES

S. V. Kiselev, A. A. Kozlov Methods of computer prediction of deformation modes of operation of geotextile nonwoven materials	19
N. V. Rokotov, O. V. Tomilova, A.V. Markovets, A. A. Ponomar Development of a 3D model of a winding product	25
M. V. Stepanov, A. A. J. K. Mahdi Hamdan, A. G. Usov Simulation of a complex bending of a fabric flap, captured by the vacuum sucker	31
O. M. Shemetova, Yu. M. Fadin Mathematical description of air movement in a cylindrical chamber of pneumatic mixer.	38
I. E. Menyailo, V. V. Sigacheva, M. V. Andreev Information device for diagnosing the technical condition of a loom with spectral analysis of 3D accelerations	45
A. Yu. Ataeva, G. I. Sverdlik, D. A. Kambolov, A. R. Ataev Study of the caps guiding channels influence on the bubbling processes in the jet bubbler.	49

PRODUCT QUALITY CONTROL. STANDARDIZATION. ORGANIZATION OF PRODUCTION

E. A. Ageeva, D. A. Ovsyannikov, A. S. Gorshkov The return on investment criteria in energy saving at light industry enterprises	53
D. A. Radushinsky, A. I. Radushinskaya About the quality management system of the project of the marine cruise center in Saint Petersburg	60
M. B. Sukhanov Cluster analysis of investment projects in the Russian light industry.	67
K. V. Kaisheva, A. I. Bogdanov Mathematical model of joint optimization of quality, price and marketing costs of a new product.	72
R. A. Gorshkov, P. P. Rymkevich Use of ground heat for hot water supply.	76
L. N. Nikitina, E. A. Kraikina, P. A. Shikov, N. M. Kasumova, A. N. Salamatova, T. A. Fliagina Effective use of assets of textile industry enterprises and plants producing chemical fibers is an important direction of import substitution	82

TECHNOLOGY AND PROCESSING OF SYNTHETIC AND NATURAL POLYMERS AND COMPOSITES

N. P. Midukov, M. A. Litvinov, T. I. Efremov, V. S. Kurov Study of paper and cardboard microstructure by 3D design.	87
---	----

I. V. Porotikova, M. B. Kirillova
 Evaluation of 3D-skan accuracy of complex shape detail 95

TECHNOLOGY OF PRODUCTION OF TEXTILE AND LIGHT INDUSTRY PRODUCTS

D. K. Pankevich
 Comprehensive assessment of the waterproofing properties of clothing materials 100

A. G. Makarov, V. I. Wagner, N. S. Klimova
 Mathematical simulation of deformation modes of operation of polymeric textile materials
 with increased accuracy 105

N. V. Pereborova
 A variant for prediction of thermoviscoelasticity of polymer textile materials
 on the basis of the thermo-deformation-time analogy 109
