

## TABLE OF CONTENTS

### MACHINES, UNITS AND PROCESSES (textile and light industry)

**N. V. Rokotov, A. V. Markovets**

Analysis of the structure of winding products using a chain fraction unit . . . . . 5

**T. V. Kapusta, A. B. Ugryumov**

Integrated approach to increasing the effectiveness of the process of moving the flexographic printing system "Windmoller & Holscher Miraflex CL 10". . . . . 10

**I. V. Kostyuk, P. V. Funtikov**

Technological aspects of tone images reproduction by screen printing . . . . . 18

### ORGANIZATION OF PRODUCTION (textile and light industry)

**N. V. Pereborova, E. I. Chalova**

Qualitative analysis of the relaxation and deformation properties of polyamide tissues for parashut dome during organization of their production. . . . . 24

**A. G. Makarov, I. M. Egorov**

Application of methods of qualitative analysis of deformation-relaxation properties of marine polymeric ropes when organizing their production. . . . . 35

**M. A. Egorova, I. M. Egorov**

Development of methods for improving product quality of textile and easy industry based on the application of information technologies . . . . . 45

**N. S. Fech, I. A. Ilyina**

Research of dependence of rheological and optical properties of flexographic inks . . . . . 56

### SYSTEM ANALYSIS, MANAGEMENT AND INFORMATION PROCESSING (textile and light industry)

**N. V. Pereborova, E. I. Chalova**

Application of system analysis for research of deformation properties of polyamide fabrics for parasutes . . . . 60

**A. G. Makarov, I. M. Egorov**

Development of methods of system analysis of deformation-relaxation processes of polymeric ropes . . . . . 71

**A. G. Makarov, K. N. Busygin**

System analysis of functional properties of special application aramid materials . . . . . 84

### TECHNOLOGY, MACHINERY AND EQUIPMENT, LOGGING, FORESTRY, TIMBER PROCESSING AND CHEMICAL PROCESSING OF WOOD BIOMASS

**E. L. Sedova, K. B. Vorontsov, N. I. Bogdanovich, S. A. Burkova**

Formation of a porous surface of carbon adsorbents of thermochemical activation of sludge-lignin . . . . . 95

**M. A. Litvinov, D. R. Tuzhilov, N. P. Midukov, V. S. Kurov**

New way of fiber bond determination for paper or cardboard . . . . . 101

### TECHNOLOGY OF MATERIALS AND PRODUCTS OF TEXTILE AND LIGHT INDUSTRY

**K. Tkach, A. Yu. Moskvina**

Analysis of historical and contemporary design of dresses' backs . . . . . 106

<b>M. A. Egorova, I. M. Egorov</b>	
Development of methods for evaluating the functional and operational properties of polymer textile materials based on their numerical forecasting. . . . .	110
<b>S. V. Kiselev, V. I. Wagner, E. A. Buryak, A. A. Kozlov</b>	
Options of mathematical modeling and computer forecasting of viscoelasticity of polymeric textile materials of technical purpose. . . . .	122
<b>A. G. Makarov, K. N. Busygin</b>	
Qualitative evaluation of operational properties of aramid textile materials — the basis for improving their functionality . . . . .	133
<b>N. V. Pereborova</b>	
Development of methods of qualitative evaluation of operational processes of textile and light industry materials in order to improve their functionality . . . . .	144
Authors list . . . . .	158
Information for authors . . . . .	160
